3 Hours / 70 Marks

Seat No.

--	--	--	--	--	--	--	--

- Instructions :**
- (1) All Questions are *compulsory*.
 - (2) Answer each next main Question on a new page.
 - (3) Illustrate your answers with neat sketches wherever necessary.
 - (4) Figures to the right indicate full marks.
 - (5) Assume suitable data, if necessary.
 - (6) Mobile Phone, Pager and any other Electronic Communication devices are not permissible in Examination Hall.
 - (7) Preferably, write the answers in sequential order.

Marks

1. Attempt any FIVE of the following :

10

- (a) Define :
 - (i) Two dimensional array
 - (ii) Multi-dimensional array
- (b) Give any four advantages of pointer.
- (c) Define type casting. Give any one example.
- (d) State any four decision making statements.
- (e) State any four math functions with its use.
- (f) State the use of following symbols used for flowchart drawing :
 - (i) 
 - (ii) 
 - (iii) 
 - (iv) 
- (g) State use of while loop with syntax.

[1 of 4]

P.T.O.

2. Attempt any THREE of the following :**12**

- (a) Develop a simple 'C' program for addition and multiplication of two integer numbers.
- (b) Explain how to pass pointer to function with example.
- (c) Explain following functions :

`getchar()`

`putchar()`

`getch()`

`putch()`

with suitable examples.

- (d) Develop a program to accept an integer number and print whether it is palindrome or not.

3. Attempt any THREE of the following :**12**

- (a) State the use of `printf()` & `scanf()` with suitable example.
- (b) Explain any four library functions under `conio.h` header file.
- (c) Explain how formatted input can be obtain, give suitable example.
- (d) Develop a program to find factorial of a number using recursion.

- 4. Attempt any THREE of the following :** **12**
- (a) Write a program to swap the values of variables $a = 10$, $b = 5$ using function.
 - (b) Develop a program using structure to print data of three students having data members name, class, percentage.
 - (c) Design a program to print a message 10 times.
 - (d) Draw a flowchart for checking whether given number is prime or not.
 - (e) Implement a program to demonstrate logical AND operator.
- 5. Attempt any TWO of the following :** **12**
- (a) Draw a flowchart of Do-while loop and write a program to add numbers until user enters zero.
 - (b) Give a method to create, declare and initialize structure also develop a program to demonstrate nested structure.
 - (c) Implement a program to demonstrate concept of pointers to function.
- 6. Attempt any TWO of the following :** **12**
- (a) Develop a program to swap two numbers using pointer and add swapped numbers also print their addition.
 - (b) Design a programme in C to read the n numbers of values in an array and display it in reverse order.
 - (c) Develop a program to find diameter, circumference and area of circle using function.
-
